Summary

Full-Stack Developer with 1 year of experience building React.js, TypeScript, and Node.js applications, including a government complaints portal and a real-time chat platform serving 200+ users. Skilled in REST API design, PostgreSQL, and MongoDB.

Education

Patkar-Varde College, Mumbai University — Mumbai, India
Bachelor of Science in Information Technology – CGPA: 8.6/10 — *2022 – 2025*

Experience

Software Developer — July 2026 – Present
SAAR IT — *Onsite, Mumbai*

- Built a bulk Excel import pipeline for Maha-HRMS, a BMC government complaints portal, loading 2,000+ complaint records with validation and duplicate detection.
- Implemented complaint intake and resolution workflows that capture complainant details from follow-up calls and route issues through the BMC department hierarchy, cutting average resolution time by 30%.
- Delivered 12+ REST APIs and 8+ frontend screens and fixed 25+ bugs across sprints and code reviews in 3 months.
- Coordinated with BMC officials and the QA team to gather requirements and ship fixes across 6+ sprints.

Full Stack Developer Intern — March 2026 – June 2026
Axentra OS (Altiss Advance) Pvt. Ltd. — *Onsite, Mumbai*

- Engineered 25 reusable React.js and TypeScript components and a 12-page merchant dashboard integrating 22 APIs for a Warranty Management platform, with analytics on performance, profitability, claims, and operations.
- Integrated 9 Ekart Logistics APIs covering order creation, shipment tracking, shipping cost, serviceability, reverse and exchange orders, and webhook-driven status updates, with fallback handling and testing alongside the Ekart team.
- Shipped a Shopify Theme App Extension for navbar customization, with SVG replacement, Shadow DOM, and multi-theme support.
- Launched a Membership & Rewards portal with 7 responsive sections and 4 API integrations, plus Django-based cart abandonment and wishlist email automation.

Junior Software Developer Intern — April 2024 – June 2024
Custom Technologies Design Lab Pvt. Ltd. — *Onsite, Mumbai*

- Resolved 20+ gameplay bugs with the development team using issue-tracking tools.
- Validated VR features during testing and supported their integration into the application.
- Maintained branches and issue tracking with Git and GitHub across the team's development workflow.
- Connected the frontend to RESTful APIs and managed data flow between application layers.

Projects

Peeltalk – Real-Time Social Chat Platform | *React.js, TypeScript, Node.js, Express.js, Socket.io, MongoDB* — Live

- Created Juice Connect, a one-to-one anonymous chat supporting real-time messaging, replies, reactions, and instant disconnection without registration.
- Secured ChatPit, a topic-based group chat, with Google OAuth to prevent fake accounts.
- Reached 200+ real-time connections and 80+ registered users, adding blog publishing and tuning state management.
- Deployed the platform to production at peeltalk.space, serving live chat and blog traffic.

FinArt – AI-Powered Personal Finance Tracker | *React.js, TypeScript, Node.js, Express.js, PostgreSQL*

- Developing a finance tracker that unifies bank accounts, cash, income, expenses, lending, and repayments, with a live net worth view.
- Designed a PostgreSQL ledger architecture that keeps balances accurate and preserves a full transaction history across account types.
- Added an AI assistant that answers natural-language questions about spending in a given period or current total balance.
- Modeled lending and repayment flows so money owed by others is tracked separately from account balances and reflected in net worth.

Technical Skills

Languages: JavaScript, TypeScript
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT, Socket.io, SQL
Databases: MongoDB, PostgreSQL, Prisma ORM
Tools: Git, GitHub, Postman, VS Code, Docker, Figma

Certifications

Python Programming Certification | TCS iON Career Edge
