Summary

Full-Stack Developer with 1 year of experience building React.js, TypeScript, and Node.js applications, including a government complaints portal and a real-time chat platform serving 200+ users. Skilled in REST API design, PostgreSQL, and MongoDB.

Education

Patkar-Varde College, Mumbai University — Mumbai, India
Bachelor of Science in Information Technology – CGPA: 8.6/10 — *2022 – 2025*

Experience

Software Developer — July 2026 – Present
SAAR IT — *Onsite, Mumbai*

- Architected SAAR One, an end-to-end HRMS for 300+ employees across 11 departments, delivering 14+ modules including attendance, payroll, recruitment, employee records, leave, approvals, notifications, and reporting.
- Contributed to Treelogy, a BMC tree-survey system managing 1,000+ tree records, with geolocation-based data capture, tree photo upload, species identification, and multi-level approvals that digitized field verification.
- Built Kora Dial, a multi-tenant cloud call-center dialer on FreeSWITCH, with 3 user roles (Super Admin, Admin, Agent) and a separate database schema per project for tenant-level data isolation.
- Implemented role-based access control, modular architecture, and schema management across 4 enterprise applications (Maha-HRMS, SAAR One, Treelogy, Kora Dial), improving maintainability and scalability.

Full Stack Developer Intern — March 2026 – June 2026
Axentra OS (Altiss Advance) Pvt. Ltd. — *Onsite, Mumbai*

- Engineered 25 reusable React.js and TypeScript components and a 12-page merchant dashboard integrating 22 APIs for a Warranty Management platform, with analytics on performance, profitability, claims, and operations.
- Integrated 9 Ekart Logistics APIs covering order creation, shipment tracking, shipping cost, serviceability, reverse and exchange orders, and webhook-driven status updates, with fallback handling and testing alongside the Ekart team.
- Shipped a Shopify Theme App Extension for navbar customization, with SVG replacement, Shadow DOM, and multi-theme support.
- Launched a Membership & Rewards portal with 7 responsive sections and 4 API integrations, plus Django-based cart abandonment and wishlist email automation.

Junior Software Developer Intern — April 2024 – June 2024
Custom Technologies Design Lab Pvt. Ltd. — *Onsite, Mumbai*

- Fixed 20+ gameplay bugs in a VR application over 3 months, tracked through the team's issue tracker.
- Tested [N] VR features and supported their integration into the application.
- Managed Git branches and merges with a team of [N] developers.
- Connected the frontend to [N] REST endpoints, managing data flow between application layers.

Projects

Peeltalk – Real-Time Social Chat Platform | *React.js, TypeScript, Node.js, Express.js, Socket.io, MongoDB* — Live

- Built Juice Connect, an anonymous one-to-one chat with live messaging, replies, and reactions, requiring no sign-up.
- Secured ChatPit, a topic-based group chat, with Google OAuth to block fake accounts.
- Reached 200+ concurrent connections and 80+ registered users; added blog publishing and optimized state management.

FinArt – AI-Powered Personal Finance Tracker | *React.js, TypeScript, Node.js, Express.js, PostgreSQL*

- Building a finance tracker that unifies bank accounts, cash, income, expenses, lending, and repayments, with a live net worth view.
- Designed a PostgreSQL ledger that keeps balances accurate and preserves full transaction history across [N] account types.
- Added an AI assistant that answers natural-language questions about spending by period and total balance.
- Modeled lending and repayment so money owed to you is tracked apart from balances and counted in net worth.

Technical Skills

Languages: JavaScript, TypeScript
Backend: Node.js, Express.js, REST APIs, JWT, Socket.io, SQL, RBAC, Multi-Tenant Architecture
Databases: MongoDB, PostgreSQL, Prisma ORM
Tools: Git, GitHub, Postman, VS Code, Docker, Figma, FreeSWITCH

Certifications

Python Programming Certification | TCS iON Career Edge
