SUMMARY

Full-stack developer with hands-on experience building scalable web applications using React.js, Next.js, Node.js, Express.js, PostgreSQL, and MongoDB. Proficient in REST API development, authentication systems, real-time communication, and database optimization. Seeking a paid software development role to contribute to impactful products.

EDUCATION

Patkar-Varde College, Mumbai University

Bachelor of Science in Information Technology – CGPA: 8.6/10

Mumbai, India

2022 – 2025

EXPERIENCE

Junior Software Developer Intern

Custom Technologies Design Lab Pvt. Ltd.

April 2024 – September 2024

Onsite, Mumbai

- Identified and resolved 20+ gameplay bugs by collaborating with the development team using issue-tracking tools, improving overall application stability.
- Supported VR feature testing and integration, contributing to smoother user interactions and a more polished end-user experience.
- Integrated RESTful APIs and managed frontend-to-backend data flow, ensuring reliable communication between application layers.
- Utilized Git and GitHub for version control, branch management, issue tracking, and collaborative development workflows.

PROJECTS

Peeltalk – Real-Time Chat Application | *React.js, TypeScript, Node.js, Express.js, Socket.io, MongoDB*

Live

- Built a full-stack real-time chat application using WebSockets, supporting features such as message reactions, live online presence indicators, and email-based account verification.
- Designed a fully responsive UI using Tailwind CSS and TypeScript, reducing bounce rate and improving average session interaction time.
- Onboarded 80+ active users by delivering a performant, polished experience through iterative UI improvements and optimized WebSocket event handling.

Production-Grade Authentication System | *React.js, Node.js, Express.js, PostgreSQL, Prisma ORM*

GitHub

- Architected a production-ready authentication system beyond basic login/register flows, featuring session management with IP and user-agent tracking stored in a dedicated sessions table.
- Implemented dual-token security using short-lived JWT access tokens and rotating refresh tokens stored in HTTP-only cookies, minimizing session hijacking risk.
- Integrated Google OAuth, cryptographically signed email verification links, and Zod-based request validation to enforce data integrity at every API boundary.
- Applied Express Rate Limiter to prevent brute-force attacks and used Mailgen to deliver branded transactional emails for account verification and password reset flows.

WhatsApp Birthday Bot | *Node.js, whatsapp-web.js, Cron*

GitHub

- Developed an automated WhatsApp bot that sends personalized birthday and anniversary wishes at midnight using scheduled cron jobs.
- Designed relationship-aware message templates (family, friends, colleagues) that dynamically select appropriate tone and content based on the recipient's relationship type.
- Deployed as a persistent Node.js background service, maintaining an active WhatsApp Web session and handling reconnection logic to ensure reliable overnight delivery.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT, Socket.io

Databases: MongoDB, PostgreSQL, Prisma ORM

Tools: Git, GitHub, Postman, VS Code, Docker, Figma

CERTIFICATIONS

Python Programming Certification | TCS iON Career Edge
